

Regarding U.S. Patent Application Number **10/781,213**

Filing Date: February 17, 2004

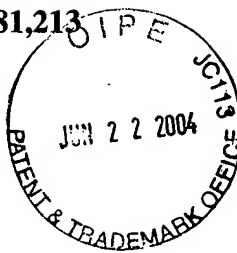

Art Unit: 3745

Applicant: Douglas Spriggs SELSAM

Address: 2600 Porter Ave. Unit B  
Fullerton, CA 92833

Phone: 714-992-5594

E-mail: [Doug@Selsam.com](mailto:Doug@Selsam.com)

Title: Side-Furling Co-Axial Multi-Rotor Wind Turbine

**Amendment:**

Please cancel the original specification, including claims and abstract and substitute the attached new specification, including claims and abstract, **as requested by the PTO.**

**Remarks:**

The new specification has the line spacing corrected – all text is now 1½ or double-spaced.

The new specification is legibly printed on clean white paper with no extraneous markings.

**Additionally:**

On page 1, first sentence, “expected to issue” has been replaced by –now issued–.

In the “Part Numbers” section, irrelevant reference numbers are deleted, while numbers with descriptions –180 building– and –190 tripod type of tower– have been added.

On page 8 line 19, the reference numeral “128” has been changed to –126–.

On page 8 line 24 the reference numeral –55– has been inserted after “guy wires”.

On page 8 line 30 the reference numeral –190– has been inserted after “tripod tower”.

On page 9 line 7 the reference numeral –180– has been inserted after “building”.

On page 12 in line 8 of the Abstract, “elevation means” has been replaced by –elevating structure– in anticipation of a PTO request to remove such legal terms from the Abstract.

- Replacement **drawings 1 – 8** have also been provided, **as requested by the PTO.**
  - Margin requirements have been complied with;
  - Reference numerals have been added;
  - New drawings printed on clean, white paper with no extraneous markings.

No new matter has been added.

Douglas Spriggs Selsam June 18, 2004
